GLOBAL BIOSCIENCES UNVEILS NEW WEB SITE

After nearly a half decade of discovery and innovation, GBI has unveiled a new web site designed to highlight all of the technology areas in which GBI is actively engaged in commercialization and research and development. The website was designed by iMarc LLC.

iMarc provides turnkey, interactive web site design and development services to help businesses generate more value from their on-line presence. iMarc's sites are more engaging for the user, yet functionally superior and easier to maintain for the administrator because of iMarc's unique content management applications.

GBI's new web site contains many exciting features such as unique customer login, broadcast emails, whitepapers, and expanded case studies and newsletters. The new web site features descriptions of our areas of technical innovation such as Groundwater Remediation, Soil Remediation, Brownfields Redevelopment, Odor Control, Well Anti-fouling (Oil and Water), Enhanced Plant Growth & Bio-Accelerated Composting, Enhanced Fish and Mollusk Growth, Lubrication, Precious Metal Recovery, Discovery of New Antibiotic and Drug Agents, and Electroplating Solution Management.

BUTANE BIOSTIMULATION TECHNOLOGIES™ (BBT) UPDATES FOR FLORIDA AND MASSACHUSETTS

After successful implementation of BBT at a Site located in Keystone Heights (groundwater remediated in four months), GBI has obtained results from groundwater testing at a second Florida location in Crystal River. After only one month of operation, the concentrations of groundwater contaminants (BTEX & gasoline) have dropped significantly. Preparation of a case study is currently underway. GBI is also in the process of closing several petroleum sites in Massachusetts, two of which are located in Canton and Waltham. These two locations have been actively undergoing groundwater and soil remediation using BBT.

BBT were developed with the single-minded goal of assisting independent retailers by lowering the costs for remediation and site restoration. We take great pride and pleasure in calling up our clients and informing them that their sites are clean.
